roster matches which at the time of the article was 25/1 to make the playoffs.Caroline Wilson Caroline Lacey Wilson (born 24 January 1992) is a British politician and a member of the Labour Party. She was elected as the Member of Parliament (MP) for Kirkcaldy at the 2017 general election, replacing the previous MP Alan Brown. In parliament, she has served as the Parliamentary Private Secretary to the Shadow Secretary of State for Housing, Communities and Local Government, Lisa Nandy. Early life and education Wilson was born in England in 1992, the youngest of three children. Career In 2010, Wilson started her first job working for the Scottish Water. She ran for the Labour Party as a parliamentary candidate in 2015 for the Kirkcaldy constituency. Wilson was elected as the MP for Kirkcaldy in the 2017 general election. In parliament, she has served as the Parliamentary Private Secretary to the Shadow Secretary of State for Housing, Communities and Local Government, Lisa Nandy. Personal life Wilson lives in Kirkcaldy, Fife, where she works as a mental health nurse. Analytic equations for the radial Biot-Savart law are presented and they are shown to be in excellent agreement with a complete set of numerical simulations from optical coil data. The theory is illustrated on both sides of the central axis and is then applied to a reconstruction of the dipole moment of a generic model of a cylindrical conductor. The model, with an appropriate choice of the ratio between the inner and outer diameters of the conductor, may be described as a cylinder of radius $R(c)$ and length $L(c)$ with a permanent magnet on the axis. It has been found that there exists a minimum in the dipole moment as a function of $L(c)$ when $L(c)$ is of the order of the outer radius of the conductor, thus implying that one can estimate the dipole moment by a measurement of the radii $R(c)$ and $L(c)$ of the conductor. 82157476af
